

MB S.p.A launches new bucket crusher at Paris trade fair

MB S.p.A, a Vicenza company and worldwide leader in the production and sales of bucket crushers, presented a new version of bucket crusher at the Intermat trade fair in Paris (April 20 to 25). The company presented the new model during one of the most important international trade fairs in the sector of construction.

The historical model has been transformed to offer an even more revolutionary product, thanks to the in-depth research of the MB team and technical engineers. The company is committed to the constant satisfaction of customers' requirements, listening to their problems faced every day on construction sites, finding solutions most suited to international situations in which MB S.p.A. operates. It is also thanks to the long lasting relationships and loyalty of clients that MB can produce bucket crushers that represent a valid work tool. The new version is in fact more resistant, featuring a more compact size and improved structural layout to facilitate operator manoeuvres on the excavator.

Despite the world crisis affecting all sectors, MB confirms its success and keeps on investing in research and development, giving priority to vertical specialization in the production of a single product that enables the guarantee of high quality and top performing bucket crushers. Also, the company participation in major national and international events in this sector has enabled MB to establish and strengthen relationships and loyalty with clients.
